www.safetyband.net

1

To be completed as confirmation of proposed procedure by doctor and patient pre-operatively on the ward.

To be completed as confirmation of proposed procedure before commencement of anaesthetic by the surgeon and/or anaesthetist within the theatre suite.

2

After checking the procedure and site with the notes, x-rays and the patient the doctor writes in the procedure and signs the band

3

The patient then initials to confirm their agreement with the site of surgery

4

The band is then placed on the wrist or ankle

5

Before anaesthesia commences the operating surgeon and/or anaesthetist must confirm the site of surgery with the band, notes, x-rays and the patient before signing the band

6

Removed by the ODP in theatre at the STOP moment and checked with all staff using notes, consent and list. Then attached to the care plan
